

# SpeedTMT™

Rapid Compression Implant

**Speed and compression of a staple,** stability of a titanium locking plate\*

now designed for fixation of the first TMT

- ✓ **Streamlined precision**  
Rapid insertion of a staple maximizes speed and efficiency
- ✓ **Powerful Stability**  
Dynamic compression combined with FastPitch® locking fixation for construct strength and stability
- ✓ **Simply Sleek**  
Ultra-low profile implant is designed to minimize soft tissue irritation and palpability

# SpeedTMT™

## Rapid Compression Implant

Position & Drill

Preload & Insert Implant

Release & Compress

Final Construct

Construct shown is at the surgeon's discretion

### Ordering Information

<b>SK64</b>	SpeedTMT™ Rapid Compression SpeedPlate® Implant
<b>SD31</b>	SpeedTMT™ FastPitch® 3.0mm Locking Screw Pack - 12, 14, 16mm
<b>SK68</b>	SpeedTMT™ FastPitch® 3.0mm Locking Screw Pack - 20, 24, 28mm

Before use of the system, the surgeon should refer to the appropriate instructions for use and surgical technique for complete warnings, precautions, indications, contraindications, and adverse events. Risks include, but are not limited to: infection, pain, discomfort from the presence of the implant, loosening of the implant, and loss of correction with nonunion or malunion. If any of these occur, additional treatments may be needed. Additional information about risks, warnings, and instructions is available at [Lapiplasty.com/surgeons/labeling](http://Lapiplasty.com/surgeons/labeling).

\*Encompasses a locking plate and screw construct.
